Adisys at work for you

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

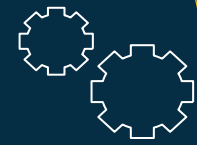

Adisys has a professional services division with numerous engineers located in Seattle and abroad, most of whom have certifications and many years of experience in their various fields of specialty. In terms of technologies, we offer complete Dynamics Business Solutions (Dynamics CRM, Ax, and Nav), Dynamics CRM Online, Azure cloud offerings, Office 365, .NET development includes Windows apps, smart client, web and mobile phone development and System Center.

Adisys also offers full Dynamics CRM based IT solutions such as IT Consulting and Professional Services. Adisys Dynamics CRM Business group primarily focuses on developing solutions on top of Dynamics CRM such as Sales Force Automation, Service Management, vertical solutions, and XRM

Dynamics CRM IMS [Incident Management System]

This solution was developed using Dynamics CRM 2013 On premise/online to enable end to end incident management solution. In few clicks you can customize and configure this solution to meet your business needs. This enables customer tracking, SLA management, 360 degree view on your incident management system. This allows end customers to create, track, search knowledge base articles.

Adisys CRM SaaS Platform [One CRM]

This solution enables small-medium to enterprise customer to host their own on premise Dynamics CRM 2011/2013 using their business vertical solutions such as Sales, Marketing, Services and XRM instances. It allows to create & manage CRM instances

Adisys TMS [Timesheet Management System]

Adisys TMS offers rich HTML5 website on the go to any size of the company to manage their employee Timesheet Management System. It enables role based and fits to any type of devices. Timesheet on the go!

Dynamics CRM BI [BI Dashboard System]

This is a custom web application built on ASP.NET tailored to Dynamics CRM to enable a powerful dashboard interface to show various analytical reports from Dynamics CRM data sources.
